

MODULE HM 60E

Hygien Module is a completely new modular hand-wash unit. A hand basin, mirror, washing liquid dispenser, disinfectant dispenser and lights are integrated into a modern, functional unit that is easy to install and maintain. Each Hygien Module is equipped to meet the customer's requirements.

Easy installation

Hygien Module is installed in the space prepared for it as one unit instead of the traditional way of assembly component by component. Hygien Module is connected to the electrical and plumbing systems with quick couplings, after which it is ready for use. If necessary, the unit can be installed a maximum of 450 mm (measured sideways) from the originally planned location. Hygien Module can be disconnected, moved and installed in a new location.

Standard components

Corian hand basin, touch-free water mixer, soap and disinfectant dispensers, mirror and led lights.

Structure and materials

Powder-coated metal frame, Corian hand basin and splashback, laminate top and bottom with moisture resistant frame, rst dispensers, laminated mirror, rst plinth.

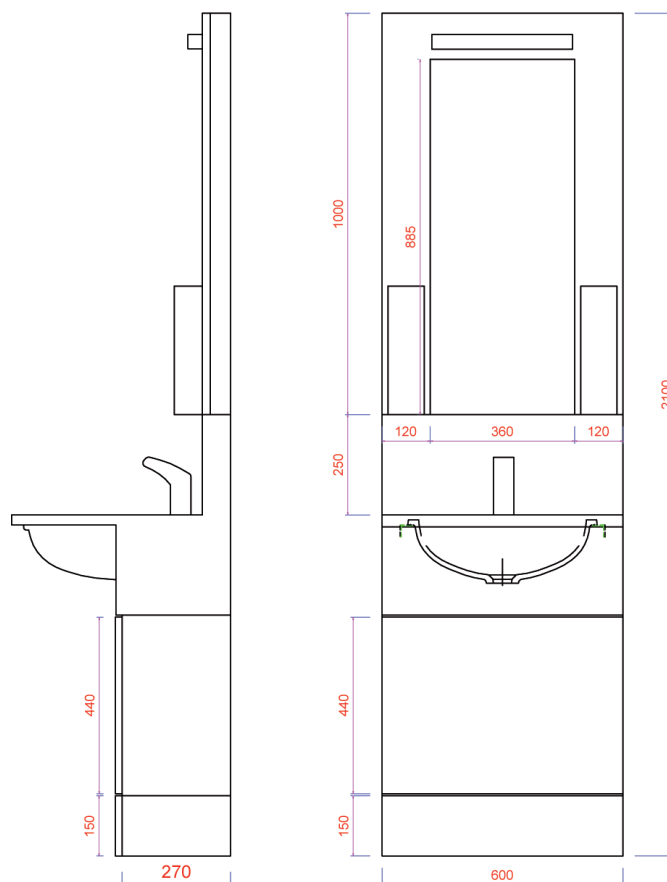

Colours

Standard colour white, special colours available by order
